

Invitation to Host Temporary Small-WEEE Collection Containers (WEEE Month / WEEE Term)

Divert electrical and electronic equipment from landfill: Your school is invited to host temporary Recycling Collection Containers for small waste electrical and electronic equipment (WEEE).

How long would the Containers be in place for? The Collection Containers could be in place for at least 4 weeks.

What can be recycled? The Collection Containers will aim to collect any small broken, unwanted or old electrical and electronic items that are attached to a plug or are powered by batteries.

Is more support available? Each school hosting the Collection Containers will be offered:

- A WEEE Kit containing:
 - Postcards for each pupil's school bag
 - Posters and other materials for display
 - Information for featuring on the school's website
- The opportunity for the school to feature in a Press Release, to promote the Recycling Activity

WEEE Month, or WEEE Term, aims to enthuse pupils and parents to divert WEEE from landfill.

How to register the School's interest: This Campaign is offered on a first come, first served basis. So if your school would like to host a WEEE Month or WEEE Term this year, please email ZeroWasteCommunity@pkc.gov.uk.
