

Sustainable Development Goals likely to be impacted

1. No Poverty

Impacted goal objectives

- improving access to affordable, energy efficient housing and reducing fuel poverty
- ensuring the human right to safe and secure housing
- reducing socioeconomic health disadvantages of poverty through housing

Minor positive – significant positive impact

Actions 1.1 aims to maximise the numbers of social homes, diversify the range of property tenures, sizes and adaptable homes including a 10% wheelchair target. Broadening the range of affordable homes through a range of models including intermediate housing, Low Cost Housing options, and affordable self-build

Action 1.4 Seek opportunities to deliver a wider range of affordable housing options e.g. intermediate housing, LCHO and affordable self-build etc.

Action 2.2 Develop a range of options that achieve a better match of households to homes

Action 2.4 Continue to work with partners to offer housing and support options to refugees and asylum seekers in response to national dispersal and resettlement programmes

Action 2.5 Enhance personalised transitional housing support to homeless households with moderate to high support needs from temporary or supported accommodation to settled housing

Action 2.6 Increase engagement with private landlords in Perth and Kinross to improve awareness of proposed PRS reforms and funding options that may be available to invest in PRS homes e.g. Home Energy Scotland, interest free loans

Action 2.7 Continuously improve and further develop the Council's approach to Rapid Rehousing via the Home First model

Action 2.8 Continue to contribute to delivery of RRTP Outcomes

Action 3.1 Ensure planning policy, placemaking and housing investment programmes contribute to improved and sustainable homes, outdoor space, health and wellbeing for all households including those with varying needs

Action 4.1 Support implementation of Perth and Kinross Local Heat & Energy Efficiency Strategy (LHEES)

Action 4.2 Expand capacity of energy and fuel poverty advice services and improve availability of information on fuel poverty and energy efficiency measures available across to front line staff and service providers

Action 4.3 Develop a community benefits framework and training academy in conjunction with the private sector to encourage apprenticeship opportunities, especially in renewables, linked to wider workforce development programme for the construction industry

Action 4.6 Build new affordable housing to enhanced energy efficiency standards and encourage private developers to do so too

Action 4.10 Set out plans covering any housing with abeyances for meeting the Scottish Housing Quality Standard

Action 4.11 Use the learning from the existing Internet of Things pilot 'Monitoring temperature humidity and CO2 in 50 homes to help tenants manage their energy, reduce fuel poverty and maintain their homes well' with a view to scale it up

3. Good Health and Well-Being

Impacted goal objectives

- reducing the health effects caused by damp and cold housing
- improving access to health services so health inequality and social exclusion are reduced
- healthy lifestyles, physical and socioeconomic living environments
- ensuring the human right to a standard of living adequate for health and well-being

Positive Impact

Action 3.1 Ensure planning policy, placemaking and housing investment programmes contribute to improved and sustainable homes, outdoor space, health and wellbeing for all households including those with varying needs.

Action 3.3 Work jointly with HSCP and third sector agencies to address workforce capacity, transport and accessibility issues in the delivery of person-centred care and support services across all areas with a focus on areas of deprivation and rural communities

Action 3.7 Work with Gypsy/Traveller community members to have a better understanding of their accommodation needs and preferences and explore and develop workable solutions

Action 4.1 Support implementation of Perth and Kinross Local Heat & Energy Efficiency Strategy (LHEES)

Action 4.2 Expand capacity of energy and fuel poverty advice services and improve availability of information on fuel poverty and energy efficiency measures

Action 4.9 Develop exemplar pilot projects that incorporate net zero planning across a range of sectors including fabric first, retro fitting and transport planning etc

4. Quality Education

Impacted goal objectives

- developing education, skills and training to improve socioeconomic conditions and reduce the health effects of poverty

Minor positive impact

Action 4.3 is to set up a training in conjunction with the private sector to encourage apprenticeship opportunities, especially in renewables, linked to wider workforce development programme for the construction industry in conjunction with the private sector to encourage apprenticeship opportunities, especially in renewables, linked to wider workforce development programme for the construction industry. This would have some impact in expanding access to highly skilled jobs particularly for younger people over the longer term.

7. Affordable and Clean energy

Impacted goal objectives

- improving access to energy efficient housing and reducing fuel poverty by increasing access to affordable clean energy
- improving air quality through decreased reliance on fossil fuel energy sources and increased energy efficiency
- promoting the use of sustainable transport and a reduction in the use of fossil fuels

Significant positive impacts

Action 3.1 milestone Improvements to Gypsy/Traveller sites including energy efficient chalets and renewable energy sources.

Action 4.1 Support implementation of Perth and Kinross Local Heat & Energy Efficiency Strategy (LHEES)

Action 4.2 Expand capacity of energy and fuel poverty advice services and improve availability of information on fuel poverty and energy efficiency measures

Action 4.6 Build new affordable housing to enhanced energy efficiency standards and encourage private developers to do so too which includes non-fossils fuel heating alternatives

Action 4.9 Develop exemplar pilot projects that incorporate net zero planning across a range of sectors including fabric first, retro fitting and transport planning etc.

8. Decent work and Economic Growth

Impacted goal objectives

- promoting skills, training and learning as a route to decent and fair work opportunities
- better access to business and employment through improved digital connectivity and sustainable transport networks

Minor positive Impact

Action 4.3 relates specifically to creating learning and career training opportunities for younger people.

Action 4.7 Work with Scottish Government and other agencies to improve digital infrastructure particularly in rural communities

Action 4.12 Facilitate the delivery of low cost, high speed broadband into social housing in partnership with the private sector and investors using fibre infrastructure roll-out.

9 Industry, Innovation and Infrastructure

- building effective infrastructure and digital connectivity to promote sustainable economic growth

Impact Minor positive Impact

Action 4.7 Work with Scottish Government and other agencies to improve digital infrastructure particularly in rural communities

Action 4.12 Facilitate the delivery of low cost, high speed broadband into social housing in partnership with the private sector and investors using fibre infrastructure roll-out.

10 Reduced Inequalities

Impacted goal objectives

- reducing health inequality through improving socioeconomic conditions

Impacts

Significant positive impact

The main purpose of all the priorities of the LHS is to promote equality, fairness and inclusiveness of all residents via increased access to more affordable homes in high quality places with access to jobs, amenities and natural environments that are easy to keep and address the needs of residents. The Actions under each priority were designed to address this overarching theme.

In summary

Actions under Priority 1 should have the outcome of increasing the variety of social and affordable housing aiming to meet better the needs of the local population.

Actions under Priority 2 should increase availability and access to housing to the most challenged residents thus improving the health outcomes.

Actions under priority 3 specifically consider the needs of older demographic to reduce inequality this group faces is being able to access suitable housing to meet their needs.

Actions under priority 4 support socio-economic conditions directly through measures to address fuel poverty, using housing improvements industry to develop training and apprenticeship academy, and actions to improve digital inclusion.

11 Sustainable Cities and Communities

Impacted goal objectives

- creating well-connected and served communities through digital inclusion.

- community empowerment through inclusive economic growth and connectivity, and effective governance and community safety
- developing informed, climate-resilient and adaptable communities

Minor positive impact

Action 1.3 prioritises the re-use of buildings supported by integrating place-making policies in determining locations for affordable housing. This will conserve the historic built environment where feasible but the overall scale of impact is expected to be minor.

Action 1.5 to continue to develop partnership working to ensure collaborative investment approach towards locality leadership and place planning processes by the evaluation of existing structures to identify opportunities that will empower local teams to make a difference within their communities.

Action 1.7 Embed the values of **Perth and Kinross Offer** to ensure investment and commitment across Services to develop and deliver the LHS Action Plan

Action 3.1 Ensure planning policy, placemaking and housing investment programmes contribute to improved and sustainable homes, outdoor space, health and wellbeing for all households including those with varying needs

Action 4.8 Take action to ensure that housing is resilient to the possible effects of climate change and flooding, and makes a positive contribution to reducing the risks and impacts of flooding and climate change in the longer term

Action 4.7 Work with Scottish Government and other agencies to improve digital infrastructure particularly in rural communities

Action 4.11 Use the learning from the existing Internet of Things pilot 'Monitoring temperature humidity and CO2 in 50 homes to help tenants manage their energy, reduce fuel poverty and maintain their homes well' with a view to scale it up

Action 4.12 Facilitate the delivery of low cost, high speed broadband into social housing in partnership with the private sector and investors using fibre infrastructure roll-out.

13 Climate Action

- designing and maintaining resilient infrastructure and buildings to mitigate and adapt to the effects of climate change

Minor Positive Impact

Action 4.1 Support implementation of Perth and Kinross Local Heat & Energy Efficiency Strategy (LHEES)

Action 4.6 Build new affordable housing to enhanced energy efficiency standards and encourage private developers to do so too

Action 4.8 Take action to ensure that housing is resilient to the possible effects of climate change and flooding, and makes a positive contribution to reducing the risks and impacts of flooding and climate change in the longer term

Action 4.9 Develop exemplar pilot projects that incorporate net zero planning across a range of sectors including fabric first, retro fitting and transport planning etc.
