

Level 3 Child Protection Training

Effective Decision Making: Assessment, Planning and Chronologies

What is the training about ?

Robust assessment is crucial in child protection work to ensure good outcomes. This training will provide practitioners the opportunity to reflect on how they assess, what influences decision making, utilising smart planning, and practice tools that can be used to aid this process. Chronologies can assist in risk assessment by identifying themes and patterns in the lives of children and young people.

Who is the training for ?

This training is designed for staff who work with children, young people and their families and are required to undertake assessments and contribute directly to care planning.

What level is this training, and do I need any specific skills ?

Attendance at this training should be agreed with your line manager. A foundation level knowledge and awareness regarding child protection policy and practice is desirable.

Whilst some content (particularly regarding policy, guidance and practice) is aimed specifically at NHS Tayside staff, staff from other services will be asked to refer to their own agencies policy, guidance and practice.

Key Information

Date and Venue

How is this training taught ?

This training is taught by experienced professionals and offers a range of methods to help participants develop both skills and knowledge. Teaching methods include direct formal input, group discussion, exercises, case study materials and use of video clips.

By the end of the training course participants will be able to:

- Know their role in assessing and managing risk effectively with contribution to planning and decision making
- Recognise the need for professional curiosity and its significance in the assessment process
- Know their role and responsibilities in relation to record keeping and information sharing
- Recognise what influences the decision-making process
- Explain the purpose of chronologies as a practice tool to support assessment, analysis and planning of interventions.
